

The Greatest Game: Two Players

SETUP: Set aside the odd and even ant cards. You won't use them for this game. Shuffle the remaining cards and deal 10 cards to each player. Each player places his or her 10 cards in a stack with the problems facing up in front of himself or herself. Play will start with the youngest player.

HOW TO PLAY: Each player answers aloud the addition problem shown on the top card of his or her stack. (Look at the back of the card if needed.) The player with the greater sum wins the turn and adds both cards to his or her winnings pile. Repeat until both players are out of cards, taking turns going first.

HOW TO WIN: The player with the most cards in his or her winnings pile wins.

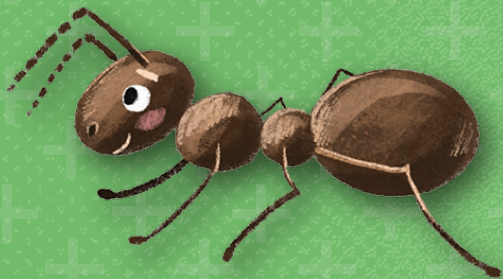

Odd or Even: One Player

SETUP: Place the odd and even ant cards faceup on the table. Shuffle the rest of the cards and deal 30 in a stack on the table with the problems facing up. This will be the draw pile. Keep the remaining cards to the side in case you want to play the game again. Before beginning, guess whether the odd or even ant will win the most cards.

HOW TO PLAY: Looking at the top card on the draw pile, say the answer aloud (look at the back of the card if needed), and say if it is odd or even. If it is odd, put it by the odd ant card. If it is even, put it by the even ant card. Continue until all the cards have been used.

HOW TO WIN: After all the cards have been played, count the cards in each pile to see whether the odd or even ant won the game. Did you choose the winner?
